

Belper Town Council

SLA Annual Report

Pro-Forma

SLA grants cover a 12-month period (April – March), although applications and reports are considered in October due to the Local Government budget setting process. Consequently, your report must be received by 1st October each year.

If this is the first year that you have received this grant, please set out your response, covering the following questions for the 6 months you have been in receipt of the grant, and also project forward for the next 6 months identifying what you intend doing.

If this is a subsequent year you have been a recipient of the grant, please provide us with information addressing the following questions for the past 12 months, i.e. October – September.

1 Obligations of Grant Recipient

The SLA application form identifies a number of obligations that the recipient is required to meet. In this report please specify:

- The obligations identified in your SLA grant agreement.
- How you have met these obligations.

2 Last Year

Please tell us how your service has gone over the past including information about when it was provided, i.e. opening times.

- Did you manage to achieve all that you planned?
- Did you have to change your plans because of influences beyond your control?

3 Finances

Has your financial situation remained more or less as you had planned or have there been any significant changes that have affected your service or plans during:

- The current year
- Next year

4 Accessibility

In line with Belper Town Council's new Accessibility Strategy, (2020) please tell us about the changes you have been able to introduce in order to improve accessibility in any way to your service. If you need help with this issue please contact the Town Council for advice on this.

5 Environment

Belper Town Council has declared a climate emergency and is intent on improving the environment locally and contributing to the national and international priorities in whatever way we can to address this emergency. Please tell us about the changes your organisation has made to reduce its environmental impact.

6 Belper Focus

If your services are also provided in areas outside of the Belper parish boundaries, can you describe how you try to ensure that the finances provided by BTC are focused on Belper residents?

7 Other Issues

- Have there been any changes to your circumstances that BTC should be made aware of?

- Do you anticipate that there may be changes in the forthcoming year, which may affect the services you provide?
