Subject: [OFFICIAL] RE: [OFFICIAL] RE: PLANS FOR THREE-CORNERED REC

Hi Deb,

Happy New Year

I'm sorry for the delay getting back to you.

I have requested further information from the previous contractor who initially quoted for the project in 2021 but they have not got back to me yet. I'm hoping for an updated estimate to establish the overall liner meterage of a 1.2m wide tarmac path which we would get in the current market – I'll chase this up.

Attached are what was previously requested in terms of a spec and the plan gives an indication of what I hope to achieve with 20k – Subject to the quotes and any site constraints. The spoil is best removed otherwise we will be left with quite a large mound.

If we get approval from the Town Council of the available funds I will write up the documents to advertise nationally for prices based on the spec above or tweaked if required. We would need to advertise on a portal for 4 weeks, then allow a week to evaluate before placing an order. We would then be in the hands of the contractor for their start date but we would ask for a work programme as part of their submission.

To complete the works on site I would recommend aiming for spring when the ground dries up and whilst children are at school.

As soon as I get a reply from our contractor I will share the news with you as a guide.

Kind regards, Richard
