

18 – Antisocial Behaviour Measure in the Coppice Carpark

After the coppice carpark was resurfaced approximately 15 year's ago, it was brought to the councils attention that motorists where using it as a racing track both day and more so night.

After taking advice from Avbc the council decided to purchase six sets of speed humps. This only helped during the day so the council purchased four large planters.

These where placed in four parking spaces near the middle of the tarmaced area.

The outdoor staff didn't like this position and after approximately two year's repositioned them to there current position's occupying two spaces in middle of tarmaced area.
