

19b – Litter Bins

Would it be possible for the huge problem of litter bins in and around the town being filled and overflowing with dog waste bags to be addressed at any forthcoming environmental meeting. I appreciate it is a difficult issue but I find it most disgusting and fear for any children trying to put litter in the bins as they are taught to. Maybe a campaign to try to educate offenders would be a thought also this must be hazardous and frustrating for the people that have to empty them.
Thankyou
