

Background on Accessibility Software Cost - £250.00 per annum.

The annual fee is the licence fee from the owner of the software. 2commune offered this when I asked about the website they have joined with an external provider to offer this service.

The software will give anyone who accesses the site the ability to:-

- Change background colour
- Change foreground colour
- Change font colour
- Change font size
- Zoom in and out
- Text to speech
- Etc.

You will most probably find that if someone has a disability they will have that software installed on their own machine. The software on BTC website is belts and braces really but if we have someone with a temporary disability they can access our website without a problem.

We can cancel this after each year if we find it to be no use to website users.
